

What is Biological Computation

organized by Albert Kao, Jessica Flack, David Wolpert

September 11-13, 2019

Participants

David Ackley, *University of New Mexico*

Martyn Amos, *Manchester Metropolitan University*

Masashi Aono, *RIKEN*

Nihat Ay, *Max Planck Institute for Mathematics in the Sciences*

Yaakov (Kobi) Benenson, *ETH-Zurich*

Swapnil Bhatia, *CATALOG Technologies*

Luca Cardelli, *Microsoft Corporation*

Kelly Clancy, *University College London*

Christine Constantinople, *New York University*

Nima Deghani, *Tufts University*

David Doty, *University of California, Davis*

Massimiliano Esposito, *University of Luxembourg*

Walter Fontana, *Harvard Medical School; SFI*

Stephanie Forrest, *Arizona State University; SFI*

Jordan Horowitz, *University of Michigan*

Albert Kao, *Santa Fe Institute*

Artem Kaznatcheev, *Oxford University*

Chris Kempes, *Santa Fe Institute*

Song-Ju Kim, *Keio University*

Andrei Klishin, *University of Michigan*

Artemy Kolchinsky, *Santa Fe Institute*

Michael Levin, *Tufts University*

Zhiyue Lu, *University of Maryland*

Ryan McGee, *University of Washington*

Ida Momennejad, *Columbia University*

Melanie Moses, *University of New Mexico; SFI*

Ilya Nemenman, *Emory University*

Orit Peleg, *Colorado University at Boulder; SFI*

Mikhail Prokopenko, *University of Sydney*

Lulu Qian, *California Institute of Technology*

Takahiro Sagawa, *University of Tokyo*

Peter Stadler, *Leipzig University; SFI*

Naftali Tishby, *Hebrew University of Jerusalem*

Erik Winfree, *California Institute of Technology*

David Wolpert, *Santa Fe Institute*
